

Project Fact Sheet

US 6 New Castle Roundabout Project

Project Overview

CDOT and local contractor, Johnson Construction, have started a highway improvement project on US 6 in New Castle. The project will build a roundabout at the busy intersection of US 6 and Castle Valley Road/Spur Road. Work will take place from Mile Point 107-107.35 along the US 6 corridor. Traffic impacts will be limited during commuter hours which are listed below.

Crews will also install rapid flashing beacons through the roundabout once completed, for pedestrian and cyclist safety. The work will improve drainage, lighting, and utilities.

Project Schedule

- Crews will be visible on site from 7 a.m.-7 p.m.
- In order to accommodate commuter traffic, the project will perform work between the hours of 8:30 a.m.-4 p.m. each day.
- Work is expected to be completed December 2024

Travel Impacts

- Lane shifts will be delineated with traffic control devices and still allow for one lane of traffic each direction to remain open for traffic flow
- The speed limit is reduced to 20 mph through the work zone
