

COLORADO CULTURAL RESOURCES INVENTORY

Historical and Architectural Reconnaissance

This form is intended for use in survey projects undertaken for preservation planning purposes and it is NOT to be used for Section 106 compliance projects. It provides a basic descriptive record of a single building, structure, object, or site. Please use the #1417b Ancillary form to document additional resources on a single site. This form may provide enough information to assess architectural significance and/or to identify other potential areas of historical significance. Full evaluations of historical significance require additional property-specific research beyond the scope of this form and typically require completion of the OAHP *Historical / Architectural Properties: Intensive Level / Evaluation* form (OAHP form # 1403). For guidance on completing this form and required accompanying documentation, please refer to the instructions, available online at <http://www.historycolorado.org/oaHP/survey-inventory-forms>

DESCRIPTION

13. Construction Features (forms, materials):

Stories	Style/Type	Foundation	Walls
One-story	Rustic	Concrete	Horizontal weatherboard; wood belt course and vertical weatherboard in gable ends
Windows	Roof	Chimney	Porch
One-by-one sliding sash with vinyl frame	Side gable roof; metal roof; overhanging eaves; lower front gable projections along the primary (north) and south elevations; attic vent under gable peaks	Raked concrete chimney	Partial length protected porch along the primary (north) elevation; partial length open porch along the west elevation

Optional: additional description (plan/footprint, dimensions, character-defining and decorative elements of exterior and interior; alterations, additions, etc.):

The one-story, irregular shaped building was constructed in 1950 as shown through review of Garfield County Assessor's Office records. The approximately 72' by 42' residence is an example of a vernacular form of Rustic style of architecture. Architectural features of the residence include a concrete foundation; an exterior envelope clad with horizontal weatherboard; a side gable roof design; overhanging eaves; metal roof; vertical weatherboard and wood belt course in the gable ends; attic vents under the gable peaks; and a raked concrete chimney. A partial length front gable porch is located on the right side of the primary (north) elevation. Vertical weatherboard can be noticed within the gable end of the overhang. The overhang is supported by unornamented square posts. The porch also incorporates square post railings. The main entryway is located in the center of the elevation within the covered porch. The main entryway incorporates a metal panel door with a sunburst window unit. The door is also fronted by a metal storm door with a one-over-one single hung sash window. The typical window unit consists of a one-by-one sliding sash unit with a vinyl frame.

Additionally, a wood staircase can be noticed leading to a secondary entryway on the right side of the west elevation. The building also features an attached garage along the south elevation. Based on historical aerial imagery, it appears that a large addition was constructed along the south elevation between 1960 and 1982.

22. Notes: Before the establishment of New Castle, the area was frequented by the Ute Tribe who inhabited much of the mountain areas in western Colorado and eastern Utah throughout the summer seasons. However, the lure of wealth from natural resource extraction from several gold rushes and silver booms prompted many American settlers to explore the Rocky Mountains between the mid to late-Nineteenth Century. By 1881, the tribe had been removed from the area and relocated to the Uintah and Ouray Reservation in Utah. The Town of New Castle was incorporated several years later in 1888, shortly after Jasper Ward built the first homestead in the area in 1883. Coal mining quickly became a vital industry in the vicinity to supply fuel to silver smelters throughout the Rocky Mountain region. The town experienced several boom-and-bust cycles of the industry until the early to mid-Twentieth Century when coal mining came to a more permanent end. In the aftermath, agricultural operations including farming and ranching began to take hold throughout the mid to late-Twentieth Century due to the fertile soil in the area. Between the late-Twentieth- and early-Twenty-first Centuries, the town has experienced a sustainable growth in population.
