

COLORADO CULTURAL RESOURCES INVENTORY

Historical and Architectural Reconnaissance

This form is intended for use in survey projects undertaken for preservation planning purposes and it is NOT to be used for Section 106 compliance projects. It provides a basic descriptive record of a single building, structure, object, or site. Please use the #1417b Ancillary form to document additional resources on a single site. This form may provide enough information to assess architectural significance and/or to identify other potential areas of historical significance. Full evaluations of historical significance require additional property-specific research beyond the scope of this form and typically require completion of the OAHP *Historical / Architectural Properties: Intensive Level / Evaluation* form (OAHP form # 1403). For guidance on completing this form and required accompanying documentation, please refer to the instructions, available online at <http://www.historycolorado.org/oaHP/survey-inventory-forms>

DESCRIPTION

13. Construction Features (forms, materials):

Stories	Style/Type	Foundation	Walls
One-story	No Style (somewhat evocative of Rustic style)	Stacked stone	Horizontal weatherboard; wood shingle siding; board and batten
Windows	Roof	Chimney	Porch
Picture window with wood frame	Shed roof with false front; overhang eaves; exposed rafter tails under the eaves	N/A	N/A

Optional: additional description (plan/footprint, dimensions, character-defining and decorative elements of exterior and interior; alterations, additions, etc.):

It is unclear in the historic record when the one-story, rectangular shaped building was constructed; however, the building demonstrates a considerable degree of degradation at the time of survey. Additionally, the approximately 16' by 12' building does not represent a particular architectural style, although the building does incorporate some Rustic style elements. Several architectural elements of the building include a stacked stone foundation; an exterior envelope consisting of horizontal weatherboard, wood shingle, and board and batten siding; a shed roof with false front; asphalt shingles; overhanging eaves; and exposed rafter tails under the eaves. The typical window consists of a picture window with a wood frame. The main entryway is located in the center of the primary (north) elevation. The main entryway incorporates a metal storm door with two picture window units.

14. Associated buildings, features, or objects: N/A

15. Landscape (important features of the immediate environment):

21. Retains Integrity of: Location Setting Materials Design Workmanship Association Feeling

22. Notes: Before the establishment of New Castle, the area was frequented by the Ute Tribe who inhabited much of the mountain areas in western Colorado and eastern Utah throughout the summer seasons. However, the lure of wealth from natural resource extraction from several gold rushes and silver booms prompted many American settlers to explore the Rocky Mountains between the mid to late-Nineteenth Century. By 1881, the tribe had been removed from the area and relocated to the Uintah and Ouray Reservation in Utah. The Town of New Castle was incorporated several years later in 1888, shortly after Jasper Ward built the first homestead in the area in 1883. Coal mining quickly became a vital industry in the vicinity to supply fuel to silver smelters throughout the Rocky Mountain region. The town experienced several boom-and-bust cycles of the industry until the early to mid-Twentieth Century when coal mining came to a more permanent end. In the aftermath, agricultural operations including farming and ranching began to take hold throughout the mid to late-Twentieth Century due to the fertile soil in the area. Between the late-Twentieth- and early-Twenty-first Centuries, the town has experienced a sustainable growth in population.
