

COLORADO CULTURAL RESOURCES INVENTORY

Historical and Architectural Reconnaissance

This form is intended for use in survey projects undertaken for preservation planning purposes and it is NOT to be used for Section 106 compliance projects. It provides a basic descriptive record of a single building, structure, object, or site. Please use the #1417b Ancillary form to document additional resources on a single site. This form may provide enough information to assess architectural significance and/or to identify other potential areas of historical significance. Full evaluations of historical significance require additional property-specific research beyond the scope of this form and typically require completion of the OAHP *Historical / Architectural Properties: Intensive Level / Evaluation* form (OAHP form # 1403). For guidance on completing this form and required accompanying documentation, please refer to the instructions, available online at <http://www.historycolorado.org/oaHP/survey-inventory-forms>

DESCRIPTION

13. Construction Features (forms, materials):

Stories	Style/Type	Foundation	Walls
One-story	No Style	Concrete	Vinyl
Windows	Roof	Chimney	Porch
Picture window with wood frame; one-over-one single hung sash with wood frame; one-by-one sliding sash; decorative wood shutters	Front gable roof; asphalt shingles; closed overhanging eaves	Brick masonry chimney	Partial length open porch along the primary (north) elevation

Optional: additional description (plan/footprint, dimensions, character-defining and decorative elements of exterior and interior; alterations, additions, etc.):

The one-story, rectangular shaped building was constructed in 1936 as shown through review of Garfield County Assessor's Office records. The approximately 46' by 28' residence is not representative of a particular style due to it possessing unornamented surfaces and lacking decorative detailing. Overall, the building is a No Style residence. Architectural features of the building include a concrete foundation; Front gable roof; asphalt shingles; closed overhanging eaves; attic vents under the gable peaks; decorative shutters; a vinyl exterior envelope; a partial length open porch along the primary (north) elevation; and a brick masonry chimney. The building also includes several window configurations including picture; one-over-one single hung sash; and one-by-one sliding sash units. Additionally, these windows incorporate wood frames. The main entryway is located in the center of the primary (north) elevation and features a wood door that is fronted by a metal storm door with a one-over-one single hung sash window. The south elevation demonstrates several additions since it was initially constructed.

14. Associated buildings, features, or objects:

A carport is located to the south of the residence. The carport was constructed circa 2010 based upon review of historical area imagery. The carport is approximately 24' by 22' and features a shed roof clad in asphalt shingles; overhang eaves; and six square post columns. Several solar panels can also be noticed on the roof.

15. Landscape (important features of the immediate environment):

- Garden Mature Plantings Designed Landscape Walls Parking Lot Driveway Sidewalk Fence Seating
- Other:

21. Retains Integrity of: Location Setting Materials Design Workmanship Association Feeling

22. Notes: Before the establishment of New Castle, the area was frequented by the Ute Tribe who inhabited much of the mountain areas in western Colorado and eastern Utah throughout the summer seasons. However, the lure of wealth from natural resource extraction from several gold rushes and silver booms prompted many American settlers to explore the Rocky Mountains between the mid to late-Nineteenth Century. By 1881, the tribe had been removed from the area and relocated to the Uintah and Ouray Reservation in Utah. The Town of New Castle was incorporated several years later in 1888, shortly after Jasper Ward built the first homestead in the area in 1883. Coal mining quickly became a vital industry in the vicinity to supply fuel to silver smelters throughout the Rocky Mountain region. The town experienced several boom-and-bust cycles of the industry until the early to mid-Twentieth Century when coal mining came to a more permanent end. In the aftermath, agricultural operations including farming and ranching began to take hold throughout the mid to late-Twentieth Century due to the fertile soil in the area. Between the late-Twentieth- and early-Twenty-first Centuries, the town has experienced a sustainable growth in population.
