

COLORADO CULTURAL RESOURCES INVENTORY

Historical and Architectural Reconnaissance

This form is intended for use in survey projects undertaken for preservation planning purposes and it is NOT to be used for Section 106 compliance projects. It provides a basic descriptive record of a single building, structure, object, or site. Please use the #1417b Ancillary form to document additional resources on a single site. This form may provide enough information to assess architectural significance and/or to identify other potential areas of historical significance. Full evaluations of historical significance require additional property-specific research beyond the scope of this form and typically require completion of the OAHP *Historical / Architectural Properties: Intensive Level / Evaluation* form (OAHP form # 1403). For guidance on completing this form and required accompanying documentation, please refer to the instructions, available online at <http://www.historycolorado.org/oaHP/survey-inventory-forms>

DESCRIPTION

13. Construction Features (forms, materials):

Stories	Style/Type	Foundation	Walls
One-story	No Style	Concrete	Board and batten
Windows	Roof	Chimney	Porch
One-over-one single hung sash with wood frames; Primarily wide units with some narrow units	Side gable; closed overhanging eaves	Several metal flues	Elevated full length open porch along west elevation

Optional: additional description (plan/footprint, dimensions, character-defining and decorative elements of exterior and interior; alterations, additions, etc.):

The one-story, rectangular shaped building was constructed in 1970 as shown through review of Garfield County Assessor's Office records. The approximately 32' by 42' building is not representative of a particular style of architecture. Overall, the building is a No Style residence. Several architectural elements of the residence include a concrete foundation; exterior walls clad with board and batten siding; a side gable roof design; closed overhanging eaves; asphalt shingles; several metal chimney flues; an elevated full-length porch along the west elevation of the building; and an elevated staircase along the primary (east) elevation. The typical window for the residence consists of a one-over-one single hung sash unit with a wood frame and casing. A majority of the windows incorporate wide frames while some consist of narrow frames. The main entryway is located in the center of the primary (east) elevation and incorporates an unornamented wood door. An elevated wood staircase leads to the main entryway as well. A secondary entryway is located in the center of the west elevation with a metal storm door that fronts a wood panel door. A decorative horizontal wood belt course can be noticed in the gable ends.

22. Notes: Before the establishment of New Castle, the area was frequented by the Ute Tribe who inhabited much of the mountain areas in western Colorado and eastern Utah throughout the summer seasons. However, the lure of wealth from natural resource extraction from several gold rushes and silver booms prompted many American settlers to explore the Rocky Mountains between the mid to late-Nineteenth Century. By 1881, the tribe had been removed from the area and relocated to the Uintah and Ouray Reservation in Utah. The Town of New Castle was incorporated several years later in 1888, shortly after Jasper Ward built the first homestead in the area in 1883. Coal mining quickly became a vital industry in the vicinity to supply fuel to silver smelters throughout the Rocky Mountain region. The town experienced several boom-and-bust cycles of the industry until the early to mid-Twentieth Century when coal mining came to a more permanent end. In the aftermath, agricultural operations including farming and ranching began to take hold throughout the mid to late-Twentieth Century due to the fertile soil in the area. Between the late-Twentieth- and early-Twenty-first Centuries, the town has experienced a sustainable growth in population.
