

COLORADO CULTURAL RESOURCES INVENTORY

Historical and Architectural Reconnaissance

This form is intended for use in survey projects undertaken for preservation planning purposes and it is NOT to be used for Section 106 compliance projects. It provides a basic descriptive record of a single building, structure, object, or site. Please use the #1417b Ancillary form to document additional resources on a single site. This form may provide enough information to assess architectural significance and/or to identify other potential areas of historical significance. Full evaluations of historical significance require additional property-specific research beyond the scope of this form and typically require completion of the OAHP *Historical / Architectural Properties: Intensive Level / Evaluation* form (OAHP form # 1403). For guidance on completing this form and required accompanying documentation, please refer to the instructions, available online at <http://www.historycolorado.org/oaHP/survey-inventory-forms>

DESCRIPTION

13. Construction Features (forms, materials):

Stories	Style/Type	Foundation	Walls
One-story	No Style	Stacked stone/concrete	Board and batten
Windows	Roof	Chimney	Porch
One-by-one sliding sash with vinyl frame	Front gable; lower side gable projections along east and west elevations; asphalt shingles; closed overhanging eaves	Rectangular stone masonry chimney	Partial length protected porch along the east elevation

Optional: additional description (plan/footprint, dimensions, character-defining and decorative elements of exterior and interior; alterations, additions, etc.):

The one-story, rectangular shaped building was constructed in 1903 as shown through review of Garfield County Assessor's Office records. The approximately 40' by 60' residence does not represent a particular architectural style. Overall, the building is a No Style residence. Several architectural elements of the residence include a stacked stone and concrete foundation; an exterior envelope clad with board and batten siding; decorative chevrons in the front gable end; lower side gable projections along the east and west elevations; closed overhanging eaves; asphalt shingles; and a rectangular stone masonry chimney. Additionally, a partial length protected porch is located along the facade of the primary (east) elevation. A majority of the windows are replacements due to their vinyl frame construction. The typical window consists of a one-by-one sliding sash unit. The front gable floorspace appears to be an addition at some point, replacing the residence's historic side gable design. Furthermore, the addition approximately doubled the building's floorspace.

22. Notes: Before the establishment of New Castle, the area was frequented by the Ute Tribe who inhabited much of the mountain areas in western Colorado and eastern Utah throughout the summer seasons. However, the lure of wealth from natural resource extraction from several gold rushes and silver booms prompted many American settlers to explore the Rocky Mountains between the mid to late-Nineteenth Century. By 1881, the tribe had been removed from the area and relocated to the Uintah and Ouray Reservation in Utah. The Town of New Castle was incorporated several years later in 1888, shortly after Jasper Ward built the first homestead in the area in 1883. Coal mining quickly became a vital industry in the vicinity to supply fuel to silver smelters throughout the Rocky Mountain region. The town experienced several boom-and-bust cycles of the industry until the early to mid-Twentieth Century when coal mining came to a more permanent end. In the aftermath, agricultural operations including farming and ranching began to take hold throughout the mid to late-Twentieth Century due to the fertile soil in the area. Between the late-Twentieth- and early-Twenty-first Centuries, the town has experienced a sustainable growth in population.
